

HONEYBEE News Letter

～ Propolis ～

June Issue vol. 27

Thank you for your continued support for Sugi Bee Garden.

This News Letter will be regularly sent out with product information and customer feedbacks of Sugi Bee Garden.

We hope you find it useful.

PROPOLIS

“ Natural Antibiotics “

Propolis made by honeybees is said to be a "natural antibiotic" and is expected to have a high antibacterial effect.

High quality natural propolis

How propolis is made

From the Baccharis trees that grow naturally in Brazil, honeybees collect sprout resin.

Propolis is a mixture of Baccharis resin and pollen with bee saliva and bee wax.

Honeybees block the entrance to the hive with propolis to prevent the invasion of bacteria and foreign enemies. It is disinfected every time a bee passes.

The entrance to the hive is only open enough for a honeybee to pass through.

PROPOLIS

Healthy ingredients of propolis

Propolis has different constituents depending on the type of plant of origin in the production area, but in general, in addition to phenolic compounds such as flavonoids contained in the resin, aromatic acids, beeswax, essential oils, amino acids, minerals, vitamins, contains over 300 substances.

■Flavonoids

It is a principal component of polyphenols and is attracting attention for its various health powers.

■Minerals

An important ingredient that is also a constituent of the human body. Since it cannot be produced in the body, it must be ingested from the outside.

■Amino acids

Amino acids are the constituents of proteins. About 20% of the body is made of amino acids, so it is an essential ingredient.

■Vitamins

Organic matter necessary for life support activities. It has a role to support proteins, lipids and sugars that are energy sources.

Improve immunity with flavonoids

Flavonoids are pigments, bitterness and pungent ingredients contained in plants and are one of the polyphenols. Flavonoids are expected to have a wide variety of health powers because they are substances created by plants for their "self-defense function" to protect themselves.

Types of polyphenols

Product Line-up

**Propolis Gold
[Capsules]**

This capsule type is recommended for people who are not good at the flavor peculiar to propolis.

Propolis Drink

This drink type contains propolis extract and ginseng extract so that you can easily take propolis. One a day for health care.

Propolis Liquid

Liquid propolis. Put an appropriate amount in your drink. You can also use it for gargling by putting a small amount in lukewarm water.

You can also watch a video about Propolis information.
